## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-8 allowed.

The following is an examiner's statement of reasons for allowance: The applicant's arguments filed 6/26/08 are persuasive. Specifically, the closest prior art, Urbano ('096) teaches a water-soluble alkyd resin which is made in situ, in a one-shot process. This results in the polyoxyethylene segments in the backbone of the resin, rather than solely at the chain end. Conversely, the water-soluble alkyd resin of the instant invention contains polyoxyethylene segments which are ***only*** chain pendant. This structural difference is not held obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
